

To who it may concern:

I am writting in response to the possibility that National or regional services such as K-Love which is heard on 90.7 in the Area of Hampton roads and could be replaced by LPFM stations. I strongly urge you not to do this. K-Love is more than a radio station to me. They play more than just songs or give the news. Listening to K-Love is a positive encouraging experience and radio in this area would not be the same with out it. Every morning on my way to work I am encouraged by the music I hear and I know I am not the only one as I see many cars with K-Love bumper stickers. I occaisionaly get to talk with some of these people and we agree that there is no other station quite like K-Love.

K-Love just recently held their pledge drive because as you know they are listener supported. Their are many that have called in and pledged thier money for K-love to stay on the Air a lot of those calls come in from my listening area as they mention the donations on the air. The kind of people that call in and pledge their support are the kind of people that care about their radio station and want it to continue by giving up their hard earned money to see keep K-Love on the air. I know this might sound crazy, but K-love changes lives and I can say that I hear of testimonies all the time about how this station has changed them for the better and I can attest to that because it has changed mine and if K-Love were to be replaced by a LPFM station then all of that would be lost. Please keep K-love on the air.
